Introduction

This eBook will teach you how to master the PayPerDownload networks and earn a great income every day, week, month.

You will gain a lot useful information and tips that will make you not fail, cause the problem is that 80% of people using PPD use them wrong!

If you already have a niche and want to start it up or expand it, please read this "Getting the downloads" if not, please go to the next section called "Finding a niche"

Getting the downloads

Getting downloads of your file is excatly what you want, therefore you'll have to spread it a correct way.

1. YouTube

YouTube is one of the most important things about PPD. And yes a lot people know about it, but the secret is that most people do it wrong!

To get a lot downloads using YouTube, you will have to make your video professional and "trustable". After that you will have to make a "professional" title and description which is going to over-excite the users, to go download your survey with a file.

Tags on YouTube

Tags on your YouTube video with your niche is the most important thing, you'll have to kindly select great tags for your niche, and not just add a lot tags.

Good tags for a (fake) Minecraft Giftcode Generator could be:

"minecraft giftcode generator" "Minecraft Giftcode Generator 2012" "minecraft premium free"

You may also put in the tags "no survey" after some of the things, since it will increase your views and file clicks, and some of them might even download it, even if it said "no survey" since they got there and think "why not?".

2. Social Networks

Social Networks is another great way of getting downloads. For example you can make (fake) contests on your facebook page or just advertise. If you also have your niche on a website it's a good idea to tell them to like and share before they can

download your file, since it will spread to their friends and you will get more noticing.

3. Pastebin

Pastebin is another great way of getting downloads. Simply put a good title and type some keywords and description and of course your website or download link. Wait some time – and a lot should have fallen for it and download your file. Cash for you!

4. Website

A website is another great way (recommended), to get more downloads. There's a lot templates to use for your niche on the internet, but I recommend you to make your own website design and such, since most people already know all the other ones and will not fall for it again.

More tips for getting downloads using website is at the bottom of the eBook.

Finding niches

You dont have any niches yet, or simply want another? Here's great ways to find niches.

1. YouTube
2. Facebook

Thats 2 of the greatest places to find niches, cause many use them for these download services.

Another way to find niches yourself is by thinking, for example. What games do I play, what games are releasing soon, do any of the things i play subscriptions or payment-systems inside?

Examples:

Xbox Live Codes

WoW Gametime

iOS Jailbreak (newest version)

Beta keys for games

Free <product name> to the first 10,000 completing a quick survey! (you've seen loads of these on Facebook and a lot people are still falling for it)

Extra Tips for getting downloads

- Get backlinks for your site
 - Use great keywords and description
 - Never use "extra tags" only use specific tag searching else people that do not want your product find it, and they are un-interested
